ABSTRACT

This article is briefly describes how to setup a sample application that works with OPC clients.

anyways here is what you need to do in your code declare these

```
using System.Net;
using System.Net.Security;
using System.Security.Cryptography.X509Certificates;
public static bool OnValidationCallback(object sender, X509Certificate cert, X509Chain chain, S
{
    return true;
}
```

put this before your code executes

```
ServicePointManager.ServerCertificateValidationCallback = new RemoteCertificateValidationCallba
```

and you are good to go..
